CONTENTS
VOLUME 16

NUMBER 1 — MARCH 1981

Hans Klob, Alfred Kracher and Gero Kurat:
The Ruhobobo, Rwanda Meteorite: A New L6 Chondrite 1
Alan E. Rubin, G. Jeffrey Taylor, Klaus Keil and Gordon Nelson:
The Correo and Suwanee Spring Meteorites: Two New Ordinary Chondrite Finds 9
Klaus Keil, George Conrad and J.E. Welsh:
The Beaver-Harrison, Beaver County, Utah L6 Chondrite 13
James L. Gooding and Klaus Keil: Relative Abundances of Chondrule Primary
Textural Types in Ordinary Chondrites and Their Bearing on Conditions
of Chondrule Formation 17
Edward Olsen: Vugs in Ordinary Chondrites 45
Nabil Z. Boctor and Gunnar Kullerud: The Loop Chondrite:
Petrology, Mineral Chemistry, and Opaque Mineralogy 61
Joy Miller, J. Nelen, K. Fredriksson, S. Darsoprajitno and S. Padmanagara:
Climus: A New Chondrite Fall 69
K. Fredriksson, J. Miller, J. Nelen and S. Darsa: The Tambakwatu Chondrite 77
E. Jarosewich and R.T. Dodd: Chemical Variations Among L-Group Chondrites, II.
Chemical Distinctions Between L3 and LL3 Chondrites 83
R.T. Dodd and E. Jarosewich: Chemical Variations Among L-Group Chondrites, III.
Major Element Variation in L6 Chondrites 93
Miscellanea 113

NUMBER 2 — JUNE 1981

Bian Depel: Chinese Meteorites 115
K. Fredriksson, C.G.R. Reid and B.J. Fredriksson:
Grier(b), a "Monomict," Brecciated Chondrite 129
M.L. Rudee and J.M. Herndon: Thermal History of the Abee Enstatite Chondrite II;
Thermal Measurements and Heat Flow Calculations 139
Akihiko Okada, Klaus Keil and G.J. Taylor: Unusual Weathering Products
of Oldhamite Parentage in the Norton County Enstatite Achondrite 141
Ian Halliday, Arthur A. Griffin and Alan T. Blackwell: The Innisfree Meteorite Fall:
A Photographic Analysis of Fragmentation, Dynamics and Luminosity 153
Vl. Bouška, P. Povondra, P.V. Florenskij and Z. Řanda:
Irghizites and Zhamanshinites: Zhamanshin Crater, USSR 171
N. Bhandari, V.G. Shah and A. Graham: The Lahrauli Ureilite 185
The Meteoritical Bulletin 193
Miscellanea 201
Erratum 201

NUMBER 3 — SEPTEMBER 1981

P. Lambert, J.F. McHone, Jr., R.S. Dietz, M. Briedj and M. Djender:
Impact and Impact-Like Structures in Algeria
Part II Multi-Ringed Structures 203
Elbert A. King, Eugene Jarosewich and F.W. Daugherty:
Tierra Blanca: An Unusual Achondrite from West Texas 229
Alfred Kracher and John Willis: Composition and Origin
of the Unusual Oktibbeha County Iron Meteorite 239

R.F. Fudali: The Major Element Chemistry of Libyan Desert Glass and the Mineralogy of its Precursor 247
A.W.R. Bevan, J. Kinder and H.J. Axon: Complex Shock-Induced Fe-Ni-Cr-C Melts in the Haig (IIIA) Iron Meteorite 261
David W. Hughes: Meteorite Falls and Finds: Some Statistics 269
Errata 283
Miscellanea 285

NUMBER 4 — DECEMBER 1981

Abstracts

U. Aeschlimann, P. Eberhardt, J. Geiss, N. Grögler and K. Marti: ^{39}Ar-^{40}Ar-Age of Norite 78236 287
J.F. Albertsen, N.O. Roy-Poulsen and L. Vistisen: Tetrataenite and the Origin of Magmatic Meteorites 288
C.J. Allègre, J.F. Minster, G. Manhes and J. Audouze: Nucleosynthesis of Lead Isotopes 288
C.C. Allen and K. Keil: Hydrothermal Alteration of Melt Rocks in Impact Craters 288
Edward Anders: What Shall We Look For in Comets? 289
John O. Annexstad: Some Observations on the Mechanism of Meteorite Concentration in Victoria Land, Antarctica 290
L.D. Ashwal, D.W. Mogk, S.C. Bergman, E.K. Gibson, Jr., D.J. Henry, J.L. Warner and R. Lee-Berman: Liquid-Vapor Inclusions in Achondritic Meteorites 290
J.R. Ashworth and A.W.R. Bevan: Electron Microscopy and Metallographic Studies of Artificially Shocked Kernouvé Chondrite 291
G.V. Baryshnikova and Eu. G. Osadchii: Structure, Mineralogy and Mineral Chemistry of Silicate Inclusions in the Elga Octahedrite 292
Abhijit Basu and David S. McKay: Agglutinates, Agglutinate Recycling and Planetary Regolith 292
F. Begemann, Z. Li, S. Schmitt-Strecker, H. Weber and Z. Xu: Radiogenic Noble Gases and the Thermal History of Kirin 293
N. Bhandari, M.B. Potdar and K.M. Suthar: Multiple Exposure History of Chondrites 293
S. Biswas, T.M. Walsh and M.E. Lipschutz: Trace Element Contents of Antarctic Meteorites 294
H. Blank, R. Nobiling, K. Traxel and A. El Goresy: Partitioning of Trace Elements Among Coexisting Opaque Oxides in Lunar Basalts Using a Proton Probe Microanalyzer 294
D.D. Bogard, G.J. Taylor, K. Keil, M.R. Smith, R.A. Schmitt and J. Danon: Impact Melting and Brecciation of the Cachari Eucrite 3.0 Gy Ago 296
R. Borchardt and D. Stöffler: Provenance of the Apollo 16 Feldspathic Fragmental Breccias at North Ray Crater 296
M. Bourot-Denise and P. Pellas: Cosmic Ray Track Studies of Jilin (Kirin) Chondrite 297
Brown, P.W. and C.T. Pillinger: Nitrogen Concentrations & Isotopic Ratios from Separated Lunar Soils 298
V.F. Buchwald: On the Oriented Sheen in Ataxites 298
M. Bukovanská, P. Jakeš and A. El Goresy: Usti Nad Orlici (Kerhartice), a L6 Chondrite from Czechoslovakia 299
R.K. Bull and S.A. Durrani: Laboratory Annealing Studies of Thermoluminescence in the Kirin (H5) Chondrite 300
J.H. Chen and G.J. Wasserburg: Cm/U, Th/U, and $^{235}U/^{238}U$ in Meteorites 301
M. Christophe Michel-Lévy and A. Lautié: Microanalysis by Raman Spectroscopy of Carbon in Chondrites 301
R.S. Clarke, Jr., Eugene Jarosewich and A.A. Almohandis: Composition and Metallography of Two Recently Recovered Wabar Meteorite Specimens 303
Donald D. Clayton: Titanium *s*-Process Isotopic Anomalies 303
Ronald E. Cohen: Refractory Inclusions in the Mokoia C3(V) Carbonaceous Chondrites ... 304
Jane Crabb: Noble Gases in Mineral Fractions of E-Chondrites 304

J. Danon, M. Christophe Michel-Lévy, C. Jenanno, K. Keil, C.B. Gomes, R.B. Scorzelli and I. Souza Azevedo: Awaruite (Ni_3 Fe) in the Genomict LL Chondrite Parambu: Formation under High fO_2 305
Daode Wang, Wei Hou and Xiaoxia Zhou: The Guangrao Olivine-Hypersthene Chondrite . 306
D.S. Dearborn and W.V. Boynton: Oxygen Isotopes, Rare-Earth Elements, Supernovae and Wolf-Rayet Stars 306
B.D. Dod, E. Olsen, D. Eatough and P. Sipiera: Umbarger and Summerfield: Two New Chondrites from Texas 307
R.T. Dodd: Metal-Silicate Fractionation in Chondrites 307
Audouin Dollfus: Photometric Analysis of the Outer Ring E of Saturn 308
M.J. Drake and J. Jones: Experimental Trace Element Partitioning Applied to Iron Meteorites 309
Gerlind Dreibus, H. Palme, W. Rammensee, B. Spettel and H. Wänke: Chemistry of the Shergotty Parent Body 310
W.v. Engelhardt and G. Graup: Ries Crater, Germany: Petrography of the Suevite and Conclusions on Crater Formation 311
P. Englert, U. Herpers and W. Herr: Preatmospheric Size of Dhurmsala, ALHA 77003, and Other Meteorites: Mn-53 and Al-26 Studies on Core Samples 311
Kim H. Esbensen and Vagn F. Buchwald: Late Crystallisation of the Natural Fe-Ni-S-P System — Evidence from Cape York Troilite Inclusions 313
Ph. Etique and P. Signer: Solar Flare Implanted Noble Gases Detected in Plagioclase Separates from Lunar Soils 313
M. Bruce Fegley, Jr.: Nitrogen Thermochemistry in Solar Composition Material 314
A.V. Fisenko, Z.A. Lavrentjeva and A.K. Lavrukhina: Thermal Experiments on Study of Metal-Troilite Relationships in Ordinary Chondrites 315
R.M. Frazier and W.V. Boynton: Trace Element Concentration in Abee Density Separates and Minerals 315
K. Fredriksson, B. Mason, R. Beauchamp and G. Kurat: Carbonate and Magnetites in the Renazzo Chondrite 316
U. Frick and R.O. Pepin: Fractionation in Solar System Krypton and Xenon, and Their Isotopic Compositions in the Solar Wind 316
Michael J. Gaffey: Thermal Models and Observational Rotational Studies of Asteroids: Implications for the Asteroid-Meteorite Connection 317
J.L. Gooding, K. Keil, T. Fukuoka and R.A. Schmitt: Correlations Between Physical and Petrological Properties of Chondrules 318
M.M. Grady, P.K. Swart and C.T. Pillinger: Stable Carbon Isotope Measurements of Ordinary Chondrites 319
A.L. Graham: An Unequilibrated Inclusion in the Romero (H4) Chondrite 319
R. Greenberg and C.R. Chapman: Origin and Derivation of Stony-Iron Meteorites 320
Richard A.F. Grieve and James W. Head, III: Manicouagan Impact Structure: Its Original Dimensions and Form 320
Jeffrey N. Grossman and John T. Wasson: The Refractory Component in Semarkona Chondrules and the Fractionation of Refractory Elements During the Formation of Ordinary Chondrites 321
Barry B. Hanan and George R. Tilton: Lead Isotopic Studies of Antarctic Chondrites 322
G.E. Harlow, J.S. Delaney, M. Prinz and C.E. Nehru: Phosphorus in Mesosiderite Metal: A IIIAB Correlation 322
A. Havette, J.C. Lorin and G. Slodzian: Ion Microscopy of Chondritic Components: A Search for Prechondritic Materials 324
W. Herr, U. Herpers and P. Englert: ^{53}Mn and ^{26}Al in Observed Chondrite Falls with High Exposure Ages 324
I. Herrwerth, A. El Goresy, E.K. Jessberger, T. Kirsten, N. Müller and E. Pernicka: ^{40}Ar-^{39}Ar Dating of Chainpur Chondrules: Search for Excessive Ages 325
J. Hertogen: Chemical Composition of Differentiated Antarctic Meteorites 326
G. Heusser and Z. Ouyang: Kirin, Its Irradiation Ages and the Reconstruction of Its Preatmospheric Size 326
Roger H. Hewins: Basaltic Clasts in the Garland Diogenite 328

H.R. Heydegger, J.J. Foster and W. Compston: Titanium Isotopic Anomalies in Meteorites: Endemic, Ubiquitous, Ephermeral, or Incompletely Characterized? 328
J.C. Huneke and I.M. Villa: ^{39}Ar Loss During Neutron Irradiation and the Aging of Allende Inclusions 329
R. Hutchison, A.W.R. Bevan, S.O. Agrell and J.R. Ashworth: H-Group Chondrites: They Accreted Hot and Petrologic Type is Inversely Related to Cooling Rate 330
G. Hwaung, L.L. Oliver and O.K. Manuel: Terrestrial-Type Xenon in Meteoritic Troilite . 331
E.K. Jessberger, O.A. Schaeffer, R. Warasila, R. Walker and T. Labotka: Unmasking "Extra" ^{40}Ar in ALHA 77005 by the Laser Extraction Technique 331
J. Jordan and E. Pernicka: Search for Extinct ^{36}Cl in Allende 332
D.T. Jost, K. Marti and E. Sutter: Pu-Nd-Xe Dating: Systematics in ^{244}Pu Fission and REE Spallation Components 334
S. Jovanovic and G.W. Reed, Jr.: Noble Metal Sites in Allende — Chemical Evidence 334
J. Jung and L. Schultz: Mineralogy, Chemistry and Noble Gases in Silicate Inclusions of the Campo del Cielo Iron Meteorite 335
M.H.A. Jungck, F.O. Meier and P. Eberhardt: Apatite in Orgueil. Carrier Phase for Neon-E 336
G.W. Kallemeyn: The Composition and Formation of the Carbonaceous Chondrites 337
I. Kawabe, L. Grossman, T. Tanaka and A.M. Davis: Trace Elements in Refractory Inclusions from the Murchison C2 Chondrite 338
W. Kiesl and F. Kluger: The Ybbsitz — Meteorite 339
J. Kiko, N. Mahninger, W. Rittershausen and T. Kirsten: Correlation Between Solar Wind ^{4}He Distribution and Noble Gas Fractionation in Lunar Ilmenites 339
T. Kirsten, H. Richter and D. Storzer: Abundance Patterns of Rare Gases in Submarine Basalts and Glasses 341
Alan S. Kornacki: Are CAI's Condensates or Distillation Residues? Evidence from a Comprehensive Survey of Fine- to Medium-Grained Inclusions in the Allende Meteorite 341
A. Kracher, F. Brandstätter and G. Kurat: Spinel Chondrules: Further Clues to Ordinary Chondrite Precursor Rocks 342
G. Kurat, F. Brandstätter, H. Palme and M. Christophe Michel-Lévy: Rusty Ornans 343
R.I. Kuznetsova and A.K. Lavrukhina: Aluminum-26 and Proton Exposure in Early Solar System 344
F.T. Kyte: Extraterrestrial Siderophiles in Abyssal Sediments 345
Bruno Lang, Andrzej Grodziński and Leszek Stoch: Differential Thermal /DTA/ and Thermogravimetric /TG/ Study of Selected Meteoritic Material 345
J.W. Larimer, B.M.P. Trivedi and J.A. Connolly: Unusual Textures and Minerals in Enstatite Chondrites 346
J.C. Laul and J.J. Papike: Comparative Chemistry of Size Fractions from the Apollo and Luna Sites 347
A.K. Lavrukhina, A. Yu Ljulj and G.V. Baryshnikova: On Distribution of Siderophile Elements in Metal Phase of Ordinary and Enstatite Chondrites 347
Franco A. Levi: X-Ray Non-Destructive Examination of Stony Meteorites 348
R.S. Lewis, M. Ebihara, E. Anders and J. Matsuda: Noble-Gas Carriers in Allende (C3V), Hamlet (LL3), and Murchison (C2) 349
S. Liu, Z. Ouyang and A. El Goresy: Mineralogy of the Kirin Chondrite Consortium Samples 350
J.C. Lorin, A. Havette, G. Slodzian and P. Lablanquie: Allende and Leoville Inclusions: Anomalous Magnesium along with Normal Potassium 351
Ian D.R. Mackinnon, Michael B. Baker and Trude V.V. King: A Comparative Study of the Murray CM2 Carbonaceous Chondrite 352
Daniel J. Malvin, John T. Wasson, Vagn F. Buchwald and Kim H. Esbensen: Compositional Variations Among Members of the IIIAB Cape York and IVA Gibeon Showers 353
G. Manhes, C.J Allègre and A. Provost: More on the (U-Th-Pb) Systematics of the Juvinas Achondrite: Evidence of Primordial Lead Component 353
Kurt Marti: The Abee Consortium: Probing the Parent Body of Enstatite Meteorites 354
Barbara J. Martinek: Evidence for Annealing of Solar Flare Tracks in Certain Gas-Rich Meteorites 354

Ursula B. Marvin and David Walker: A Lunar Troctolite with Unique Evidence of Remelting and Vesiculation 355
J.P. McKinley, G.J. Taylor and K. Keil: The Origin of Apollo 16 Dimict Breccias 356
S.G. McKinley, E.R.D. Scott, G.J. Taylor and K. Keil: A Unique Type 3 Ordinary Chondrite Containing Graphite-Magnetite Aggregates — Allan Hills A77011 357
N.J. McNaughton, C.T. Pillinger, J. Borthwick and A.E. Fallick: Deuterium/Hydrogen Ratios from Unequilibrated Ordinary Chondrites 358
H.Y. McSween, Jr. and A.M. Reid: Igneous Layering in an Achondritic Meteorite 359
F.O. Meier, M.H.A. Jungck and P. Eberhardt: Chemical Composition of Ne-E Rich Phases in Orgueil 359
R. Michel, G. Brinkmann, R. Stück and W. Herr: On the Production of Cosmogenic Nuclides in Meteorites by Solar Protons 360
R.K. Moniot, T.H. Kruse, W. Savin, T. Milazzo, G. Herzog and R. Warasila: Allan Hills 78084: ^{10}Be and Noble Gas Contents 361
C.B. Moore, C.F. Lewis and J.C. Clark: The Penwell Stony-Iron Meteorite 361
Hiroshi Mori and Hiroshi Takeda: Evolution of the Moore County Pyroxenes As Viewed by an Analytical Transmission Electron Microprobe (ATEM) 362
M.T. Murrell and D.S. Burnett: Th/U Microdistribution in Enstatite Meteorites 363
C.E. Nehru, J.S. Delaney, S. Frishman, G.E. Harlow and M. Prinz: Orthopyroxenites in Howardites and Mesosiderites Contrasted with Diogenite: Minor Minerals and Their Implications 364
H.E. Newsom and M.J. Drake: Constraints on the Origin of the Moon and the Metal Content of the Eucrite Parent Body Deduced from the Partitioning Behavior of Tungsten 366
S. Niemeyer and G.W. Lugmair: Titanium Isotopic Anomalies in C1 and C2 Chondrites .. 366
K. Nishiizumi, M. Imamura, M. Honda, O. Nitoh, K. Nagao and K. Takaoka: Cosmogenic Nuclides in Yamato Meteorites 367
H. Nishimura and J. Okano: Sims Measurement of Magnesium Isotopic Ratios in Chondrites 368
S.J. Norris, P.W. Brown and C.T. Pillinger: Laser Pyrolysis for Light Element and Stable Isotope Studies 369
Paul Novotny: Tetrataenite in the Estherville Mesosiderite 370
A. Okada and K. Keil: Caswellsilverite, $NaCrS_2$, a New Mineral in the Norton County Enstatite Achondrite 370
K.A. Olive and D.N. Schramm: OB Associations and the Early Solar System 371
G. Osadnik, U. Herpers, W. Herr and P. Englert: Spallogenic ^{53}Mn in the Kirin (Jilin) Chondrite 371
R. Ostertag: Annealing Experiments on Experimentally Shocked Feldspar Single Crystals . 373
U. Ott, F. Begemann and H.P. Löhr: Cosmogenic Noble Gases in Diamond-Bearing ALHA 77283 Iron Meteorite 373
H. Palme and F. Wlotzka: Iridium-Rich Phases in Ornans 373
D.A. Papanastassiou, G.J. Wasserburg and F.R. Niederer: Correlated Isotope Anomalies on the Wing of the Iron Abundance Peak 375
P. Pellas, C. Perron, G. Crozaz, V.P. Perelygin and S.G. Stetsenko: Fission Tracks in the Marjalahti Pallasite 375
R.O. Pepin and U. Frick: Noble Gases and Nitrogen in Lunar Breccia 79035 376
E. Pernicka and J.T. Wasson: A Study of Refractory Siderophile Elements in Iron Meteorites 377
R.S. Rajan, G. Poupeau, A.S. Tamhane, J. Gooding and T.R. Watters: Incorporation of Olivines in the Matrix of Carbonaceous Chondrites: When Did It All Happen? 378
Ermanno Rambaldi: Relict Grains in Chondrules 378
W. Rammensee and H. Wänke: Reduction and Metal Forming Processes in Carbonaceous Chondrites 379
M.N. Rao, C.M. Nautiyal, J.T. Padia and T.R. Venkatesan: Evolution of Carbonaceous Chondrite Parent Bodies 380
K.L. Rasmussen: Local Bulk Ni-Concentration Variation in Iron Meteorites 380
R.C. Reedy: Cosmic-Ray-Produced Deuterium, Carbon-13, and Nitrogen-15 in Meteorites 381
S. Regnier, B. LAvielle, M. Simonoff and G.N. Simonoff: Spallation of Sr, Y and Zr Targets and Cosmogenic Krypton 382

Alan E. Rubin, E.R.D. Scott, G. Jeffrey Taylor and Klaus Keil: The Dimmitt H Chondrite Regolith Breccia and Implications for the Structure of the H Chondrite Parent Body 382
Graham Ryder: Petrogenetic Considerations for Ureilites 383
L. Schultz, J.O. Annexstad, W.A. Cassidy, H.Y. McSween, L.A. Rancitelli and J. Schutt: Antarctic Search for Meteorites: Preliminary Report of the 1980/81 Field Season in South Victoria Land 384
E.R.D. Scott, G.J. Taylor, P. Maggiore, K. Keil, S.G. McKinley and H.Y. McSween, Jr.: Three CO3 Chondrites from Antarctica — Comparison of Carbonaceous and Ordinary Type 3 Chondrites 385
Denis M. Shaw: Crustal Evolution of the Earth 386
Masako Shima, S. Murayama, H. Yabuki and Makoto Shima: Chemical Composition, Petrography, Minerlogy and Rare Gases in the Chondrite Ogi 386
J.A. Shukolyukov, Dang Vu Minh, V.I. Simonovsky, M.M. Fugzan, M.A. Nazarov and M.I. Korina: Isotopic Composition of Xe and Kr in the White Inclusions of Carbonaceous Chondrite Efremovka (C3V) 387
M.S. Spergel, R.C. Reedy, O.W. Lazareth and P.W. Levy: Neutron-Capture Reactions in Meteorites 387
V. Stähle: The Impact Melt Rocks at the Ries Crater 388
John R. Stephens and S.H. Bauer: On the Homogeneous Condensation of Fe, Si, FeO_X and SiO_X Vapors, and Implications for Astronomical Condensation 388
D. Stöffler, R. Ostertag, W.-U. Reimold and R. Borchardt: Stratigraphy and Evolution of the Upper Highland Crust Near North Ray, Apollo 16 389
D.W. Strangway and N. Sugiura: The Intensity of the Ancient Lunar Magnetic Field, Revisited 389
N. Sugiura and D.W. Strangway: Magnetic Properties of the Abee Meteorite 390
Hiroshi Takeda and Hiroshi Mori: Yamato-75032, a Missing Link between Diogenites and Eucrites 390
Lawrence A. Taylor, R.H. Hunter and H.Y. McSween: The Significance of Rust in Lunar Rocks and Meteorites 391
K. Thiel, U. Saßmannshausen, H. Külzer and W. Herr: Simultation of Lunar Sputter Erosion Using Heavy Ion Bombardment 392
K. Tomeoka and P.R. Buseck: Al-K-Bearing Phyllosilicates in a Ca-Al-Rich Inclusion from the Murchison C2 Meteorite 392
